

UNDERSTANDING ERECTILE DYSFUNCTION: COMMON CAUSES & TREATMENTS

Most men experience erectile dysfunction (ED) at some point in their lives, and your risks increase significantly as you age. While the symptoms can be frustrating, it's important to know that ED can often be effectively treated with medications.

HOW ED MEDICATIONS WORK

ED medications help improve blood supply to the penis. In combination with sexual stimulation, drug therapies can produce an erection sufficient to initiate and complete intercourse. Most medications start working from 15 to 60 minutes, allowing you to reclaim normal sexual activity and functions.

Although there are many effective ED medications available today, the cost of those medications can be prohibitive for many patients.

HOW MEDISUITE WORKS:

Your doctor sends a prescription to MediSuite.

A MediSuite pharmacist contacts you to answer questions, discuss savings and process your order.

Your medications are quickly shipped directly to your home in discreet packaging.

Refills can be ordered by phone.

Medication from MediSuite costs as little as \$1-\$3 per pill, compared to \$70 per pill through traditional prescriptions.

MEDICATION FAQS

PATIENT RESOURCES

Ordering your ED medications through MediSuite comes with a variety of advantages – from cost savings to discreet delivery. Explore commonly asked questions about the prescription process and options below to learn more about how you might benefit.

What types of medications do you offer?

At MediSuite, we offer generic equivalents for a variety of medications, including: Viagra, Flomax, Zytiga, Levitra, Clomid, Avodart, Crestor, Cialis, and more.

Why should I consider generic medications?

Our FDA-approved generic medicines work in the same way and provide the same clinical benefit as their brand-name counterparts. The only difference is the price.

How is MediSuite able to offer better prices?

We cut out the middleman and buy generic medicines directly from top manufacturers. That means we can pass on the savings to you directly.

How are refills handled?

To get a refill, you can simply call us at 919-200-6952 or 1-800-601-0691, and we'll process your order that day. You can also submit your refill requests online 24/7 for even more convenience.

Does MediSuite accept insurance?

No, we do not. Our pricing is the set cash price. This is because most insurance plans do not cover our offered medications anyway, as they are typically not considered "necessary" or "life-saving". If they do, then it is most likely for only a couple of pills per month.
